Data Science Lifecycle

1. Data scientists use techniques to transform data into a visual representation that can be easier to understand by humans
2. Data science platform market is expected to grow by upwards of 20% annually.
3. Data science generally falls under math, statistics, and computer science.
4. The Life Cycle
 - a. Question
 - b. Collect Data
 - c. Wrangle Data
 - d. Analyze Data
 - e. Visualize Information
 - f. Communicate Information
5. All steps in the life cycle are all fluid
